E-Read Texas – TSLAC E-book project

July 8, 2019

E-Read

TEXAS

I am excited to announce the launch of E-Read Texas, a new statewide initiative to bring E-books to Texans through libraries starting with small community libraries in all parts of the state.

The E-Read Texas program will provide e-book content via an easy-to-use platform that will allow readers to simultaneously see TSLAC content alongside any provided by their local libraries.

TSLAC has signed an agreement with Amigos Library Services to implement SimplyE, an open source e-book application, in small community libraries across the state, starting with those using the Biblionix Apollo integrated library system. In July and August, Amigos will work with those libraries to make the application available to their customers. In September, TSLAC will make e-books available to libraries and readers across Texas. Any library that has enabled the SimplyE application will be able to easily offer E-Read Texas content alongside whatever e-books DPLA currently offering through other providers.

# E-Read Texas – An Overview

- **A statewide collection of e-books**
  - Separate from TexShare Databases
  - No cost to libraries
  - Primary goal: to help small and rural libraries offer e-books to their patrons
- **An app to simplify access to e-books: SimplyE**
  - Implementation and hosting by Amigos
  - Supported by TSLAC
  - Libraries work with Amigos to add content
  - Patrons can read TSLAC-provided e-books alongside their own e-books

#eBooksForAllALA American Library Association

Limiting access to eBooks for libraries means limiting access for readers like you.

America's libraries are committed to promoting literacy and a love of reading with diverse collections, programs and services for all ages. Downloadable content and eBooks are often many readers' front door to accessing material at their local library.

In 2019, one publisher announced it would limit readers' access to new eBook titles through their libraries. Macmillan Publishers decided it would allow libraries – matter the size of their city or town – to purchase only one copy of each new eBook title for the first eight weeks after a book's release.

Before the embargo took effect on November 1, 2019, ALA collected 160,000 signatures from readers who urged Macmillan not to go through with their plan. We delivered these signatures in person to CEO John Sargent, but Macmillan's policy remained unchanged. Readers have been persistent in their opposition. Signatures on our petition eventually increased to more

But sometimes we can't avoid limits:

- Initial copies
  - Non-fiction: 2-5
  - Fiction: 2-10 copies
    - High-demand fiction is expected to be needed for book club titles and school assignments
- Hold ratio
  - 6 holds per copy for e-books until a maximum of 250 copies is purchased
  - After 250 copies of any single title are purchased, TSLAC may attempt to negotiate a statewide license with publishers

E-Read Texas

E-Read Texas brings electronic books to Texans served by small community libraries in all parts of the state. E-Read Texas provides library e-books and an e-reader application that make it possible for all Texans served by public libraries to access e-books.

SimplyE

TSLAC has partnered with [Amigos Library Services](#) to implement [SimplyE](#), an e-book app, for smaller public libraries. SimplyE was developed by the New York Public Library in partnership with other major libraries in the nation in response to challenges patrons face in accessing e-books. As of May 2020, Amigos has implemented SimplyE for over 70 public libraries from all parts of Texas ([map](#)).
